

ASO is a Chapter
of the National Audubon Society
Serving Eastern Nebraska
and Western Iowa

Join Audubon at Banquet Tuesday, May 10

Johnny's Cafe on L Street will be the site of our Spring Banquet held on Tuesday, May 10. We will begin with cocktails at 6:00 p.m. followed by a buffet dinner at 7:00.

Highlight of the evening will be a presentation by Michael Forsberg, acclaimed for his outstanding photographs of Sandhill Cranes and his fine writing about the Cranes. Michael's engaging presentations are loved by audiences for the beauty of photos, music, and his witty and wise commentary.

His photos and articles may be best known in our state through their appearance in *Nebraskaland Magazine*. They have also been published in *National Geographic* and other national publications. His recent book, "On Ancient Wings," with appeal to Sandhill Crane lovers, will be offered for sale during the evening.

The Photo Contest is back with us through the work of Eric Scholar, coordinator. Entries will be displayed for our enjoyment, having been judged and prizes awarded. All present at the banquet may also vote for their favorite, resulting in a prize of Most Popular. Eric Scholar, 551-5045, is organizing this contest. The deadline for drop-off of entries is May 2, so hurry with yours!

Also part of the evening will be presentation of a Service Award and installation of officers.

Please use the form on page 3 to make your reservations and mail to the addressee shown.

Do not delay - the deadline is May 6. We hope you will join us for dinner, an outstanding presentation, and conviviality to wrap up our year of activities!

Sarpy County Bird Count - Sunday, May 8

The annual Sarpy County Bird Count will be held Sunday, May 8 (Mother's Day), rain or shine. To sign up, please phone Clem Klaphake, Count organizer, 292-2276, or email him at ckavian@cox.net.

The emphasis is on counting species and less on numbers of each species. Counters may help for a half day or all day.

Editor's Note: The reference in the April issue to quadrants outside Sarpy County was erroneous. For more information, contact Clem at the above phone number or email address.

ASO Garden Walk Sunday, July 10

By Jackie Scholar
How does your garden grow? Do you have a garden that you spend hours on so that you can relax and enjoy it? Why not invite others to see the fruits of your labors?

We have had many wonderful, beautiful, and creative gardens on the previous years' Garden Walks. We especially like gardens with some unique feature such as a shade garden, vegetable gardens, gardens of grasses, ponds, ironwork, or other features. If you love your garden, why not let others enjoy it too?

Please consider being in this year's Audubon Society of Omaha Sunday, July 10, from 12:30 until 5:00. Master Gardeners will be on hand at several of the sites to answer questions you might have about gardening.

The Vintage Car Club has scheduled their annual summer event to coincide with our Garden Walk, in order to give their members an additional activity to enjoy that day. We wholeheartedly

welcome their participation.

We need volunteers to help with planning and with the pleasant task of

Nelli's Notes

By Nelli Falzgraf

I want to thank the membership for the opportunity to serve as President of ASO since 2003. Without your participation and fellowship, our Chapter couldn't continue its diverse programs, projects, and partnerships.

It seemed my job was to back up elected officers and directors, support committees who provide activities, facilitate core functions, and take care of finances.

We're fortunate that Board members have come to us with a background working with other organizations, have experience managing surprises and changes of directions, and work for the good of ASO as a whole. I appreciate and am grateful to Chapter and Audubon leaders.

Mission and Priorities

The NAS mission was restated, tailored specifically to ASO, as follows: to promote environmental awareness to the community through education, with an emphasis on birds. We identified priorities: continue educational efforts, strengthen birding interests, and encourage research at Heron Haven.

Education

The ASO continued to provide monthly nature programs and informative newsletters. Volunteers provided outreach to our community, including birding classes; programs on birds, wildflowers, Lewis & Clark, and others; and partnered with the Birding Club and Omaha Raptor Team. Volunteers participated in the Nebraska Alliance for Conservation and Environmental Education planning and informed our readers of conservation issues via the *Meadowlark*, programs, and emails.

Birding Interest

We continued birding trips, NAS and DeSoto Counts, and the Great Backyard Bird Count. Our members monitored bluebird and kestrel trails; helped with HawkWatch, USGS's Breeding Bird Survey, and Tern & Plover Conser

vation Partnership; and led trips for Nebraska and Iowa Ornithologists' Unions. We worked with Audubon Nebraska's Important Bird Areas, Nebraska partnership for All Bird Conservation Birding Trail Workshop, and NGPC's Natural Legacy Project.

Natural Areas Management

The ASO monitored a 52-acre greenspace in Washington County since 1998 and managed two natural areas. Volunteers continued to restore our 13-acre Prairie Preserve under the direction of Glenn Pollock, Prairie Manager. There were attempts to develop the adjacent land for a shopping mall and cut an access road through the never-mowed part for a housing area. The Prairie Manager wrote the Planning Board and City Council to protect and defend ASO land against claims.

The ASO contributed \$87,530 to the Papio-Missouri NRD for its purchase of the 10-acre Heron Haven wetland in 1992, mostly using ASO general funds. Much volunteer time and effort was put into fundraising to develop it for talks and walks, including \$240,000 for construction and other costs for maintenance, projects and programs. Because of high costs and the uncertainty of a possible project to removal invasive grass, it was decided to hold off on big projects for awhile. The butterfly garden, attracting 22 species of butterflies, continues to be a highlight of Heron Haven, and we welcome volunteers who have a green thumb and love of beauty.

In December the NRD was contacted that a corporation was formed, the Friends of Heron Haven, that is outside of the ASO, has separate funds, and intends to "operate Heron Haven." Recently they resolved that the ASO should sign an NRD contract and give them management. However, it's owned by the NRD and the decision will be theirs.

Administration

We nominated new officers and directors, held orientation for new board members, handled Chapter funds, compiled a grants list since 1993, used email to facilitate communication (minutes and business), kept current with Audubon Nebraska, and attended a symposium on volunteer resources.

The ASO contributed \$70,000 to the NRD for its purchase of the building in 1996 and moved in 3 years later. Many volunteers worked to renovate, maintain, and staff for visitors, but it was costly—over \$1,200 a month the past 6 years. Almost 2/3 of the building overhead was paid

from ASO general funds, which are mostly our bequest funds, Birdseed Sales, and NAS chapter share for new members that National recruited.

The building on the floodway was found to have mold from floods and roof leaks. Two board members had difficulties with allergies in the building. ASO paid for one inspection.

Support Services

Our resource-raising efforts included new merchandise and outside marketing venues, Birdseed Sales, Yonkers Community Day, Zoo Safari International Migratory Bird Day.

Farewell

Thank you all for volunteering and supporting the ASO and partners. I hope you will continue with the good work and give your wholehearted support to the next administration.

Farewell

Thank you all for volunteering and supporting the ASO and partners. I hope you will continue with the good work and give your wholehearted support to the next administration.

Help is needed for work that is a birder's delight. Annually the U.S. Geological Survey sponsors monitoring of breeding birds to track their population and distribution.

A structured protocol is involved, with a birder and a recorder team driving a specific 25-mile route in Nebraska counting all the birds seen and heard at 1/2 mile intervals.

This is an opportunity to become familiar with birds of a niche different from that of our local species. A route is to be monitored any day in June.

If you can help, please contact Loren & Babs Padelford, 292-5556, for more information and available routes.

Ten Commandments for a Healthy Yard

From the National Audubon Society

1. Go Organic

Just say NO or limit exposure to toxic chemicals.

Nourish with "brown gold" (compost), slow release organic rock fertilizers or limestone.

2. Make Your Turf Tough

Use grass varieties developed for your area.

Use sharp blades to mow 3 to 4 inches high. Short clippings decompose fast to add nitrogen instead of thatch.

Water deeply only when needed and aerate for dense, deep roots.

3. Go Native

Native plants mean less care, less time, less expense.

The more native plants in your yard, the more healthy habitats for birds and other wildlife.

Challenge—Reduce Lawn Area by 25th this season.

9. Respect Your Neighbor's Right to Know

Notify your neighbor before using pesticides that could drift, remain active on lawn areas, or settle in water.

Children and pets are easily exposed and can take residues into homes.

As neighbors and lawn service to do the same.

Contact local municipalities to learn what, where, and when chemicals are used.

Ask decision makers to consider safer alternatives.

10. Teach Tolerance and Be Tolerant

Create natural yards with a variety of pests, predators, weeds, wildlife and native plant species.

Plant bird and wildlife habitat.

Enjoy controlled untidiness, not time-consuming lawn maintenance.

4. Know Your Enemies

Show by doing.

Get a field guide to identify insects.

Encourage neighbors to build continuous habitat from yard to yard.

Match control to pest.

Use control only if a high number of insects exist.

For a complete copy of National Audubon's "Guide to a Healthy Yard and Beyond," email audubonathome@audubon.org. To learn more about pesticides, contact National Pesticide Information Center (npic.orst.edu/index.html) or call 1-800-858-7378.

Learn life cycles so that you do not treat unnecessarily.

5. Treat Only When Necessary

Use nontoxic methods first.

It is Unbelievable that.....

Pick off and dispose of insects, vacuum, prune out infestations, or hose off garden plants.

• 3 times more pesticides are applied per acre to home lawns and gardens than are applied to agricultural crops.

6. Pick Your Pesticides

Not all chemicals are created equal.

"Shotgun killers harm beneficial insects.

• Homeowners apply an estimated 60 million pounds of herbicides and insecticides per year to their homes, gardens, and lawns. This does not include applications made to these areas by pest control or lawn care professionals.

Ask your lawn-care service to list pesticides used.

Look for EPA toxicity ratings: caution (least toxic), warning, poison (most toxic).

• 86,880 pesticide exposure cases were reported to the national network of Poison Control Centers in 2000. More than half of these poisoning cases involved children under the age of six.

7. Use Biological Controls or Biopesticides

Most have very little environmental impact.

• It is estimated that 72 million birds die each year as a result of direct exposure to pesticides on agricultural lands alone. Lawn pesticides cause the death of an additional 7 million.

Most decompose quickly and affect only the target pest.

• Home lawns blanket at least 21 million acres - that's an area larger than Maryland, Massachusetts, and New Hampshire combined.

8. Follow Directions and Protect Yourself

Read labels before you buy or use a product.

• Non-native weeds consume 4600 acres of wildlife habitat per day on public land in the U.S.

Always wear protective clothing while mixing and applying.

Never use more than recommended. Remember—Less is Best for survival of beneficial insects!

Do not apply pesticides in windy conditions, near water sources, people, pets or wildlife habitat.

Learn signs of pesticide poisoning.
